

Folding instruction

For the FEFCO 0427 box

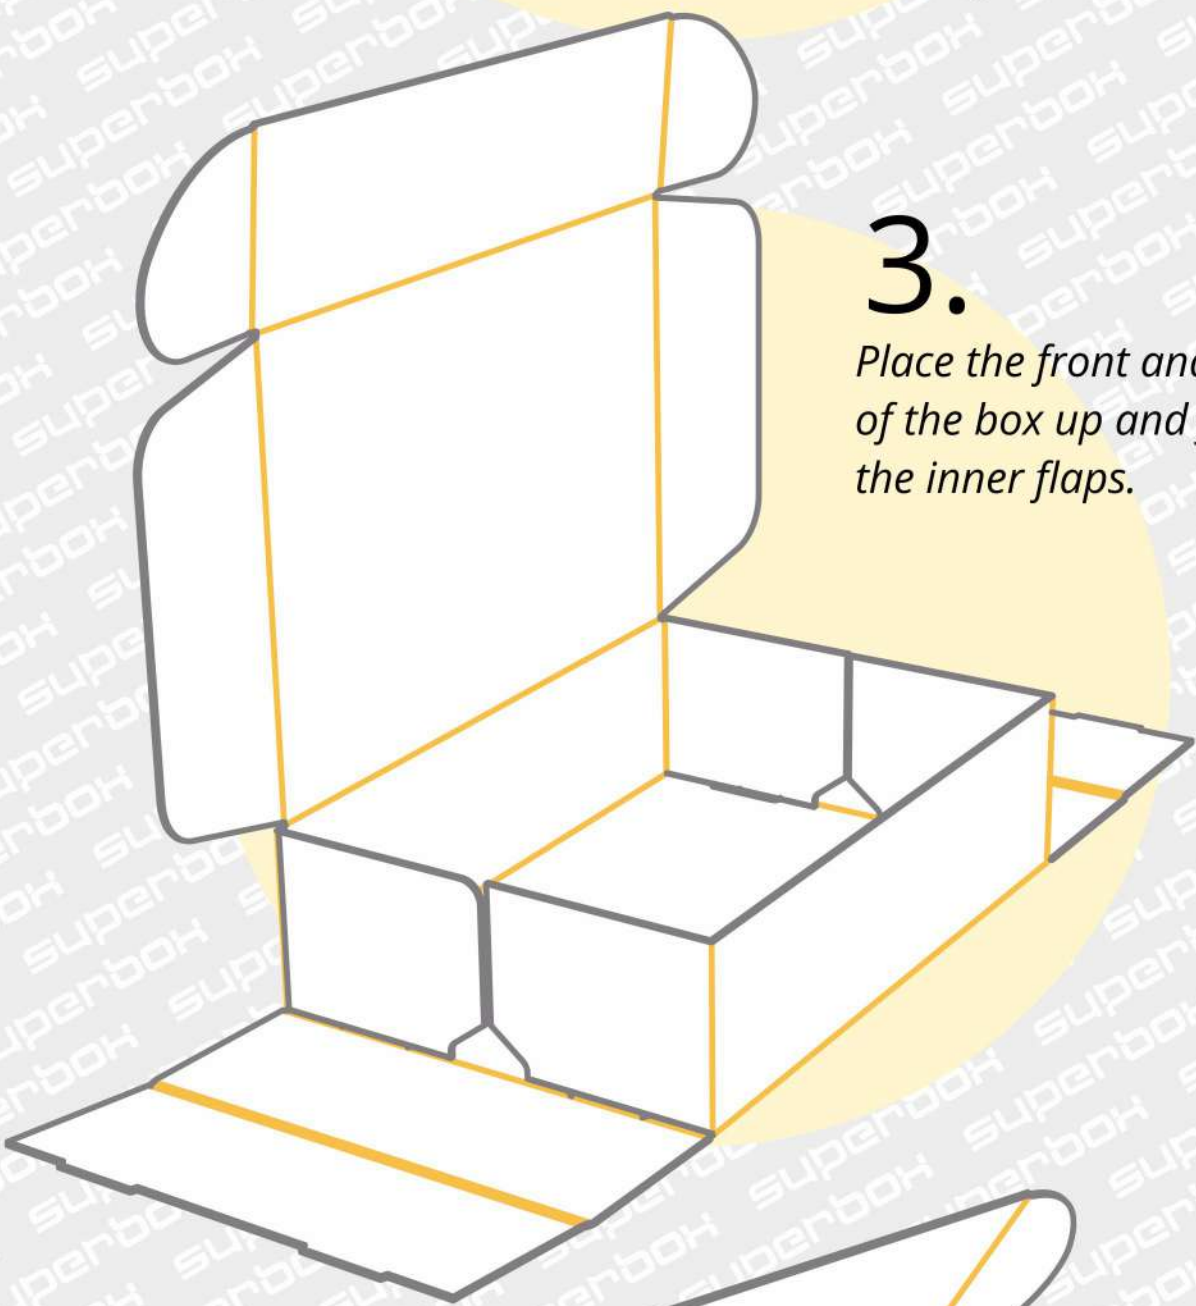

1. Place the cardboard form on a flat surface and "exercise" the creases by bending them slightly back and forth.

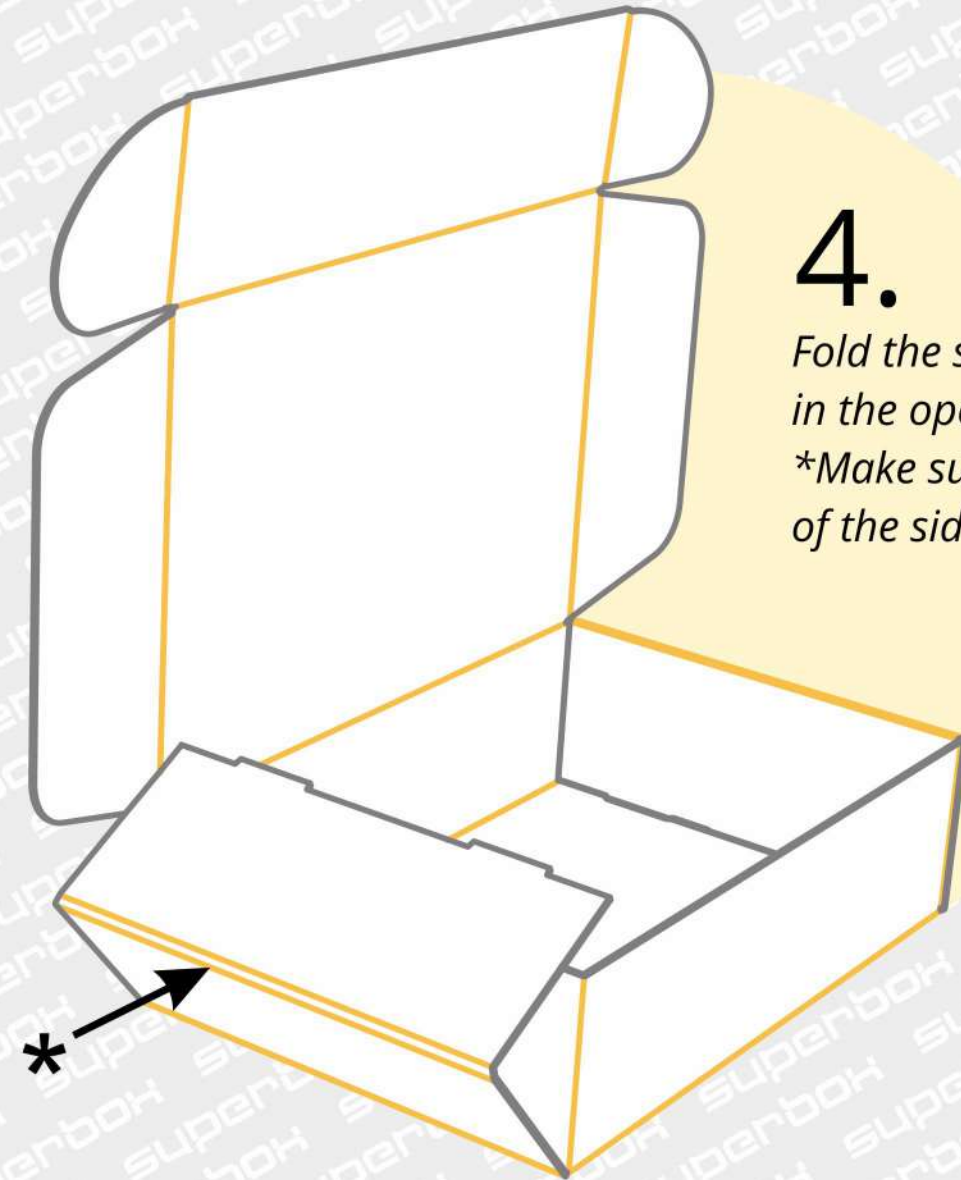

2. * Fold the cover closing line and the front line stronger to make the box less bulgy after you are done.

3. Place the front and back walls of the box up and fold in the inner flaps.

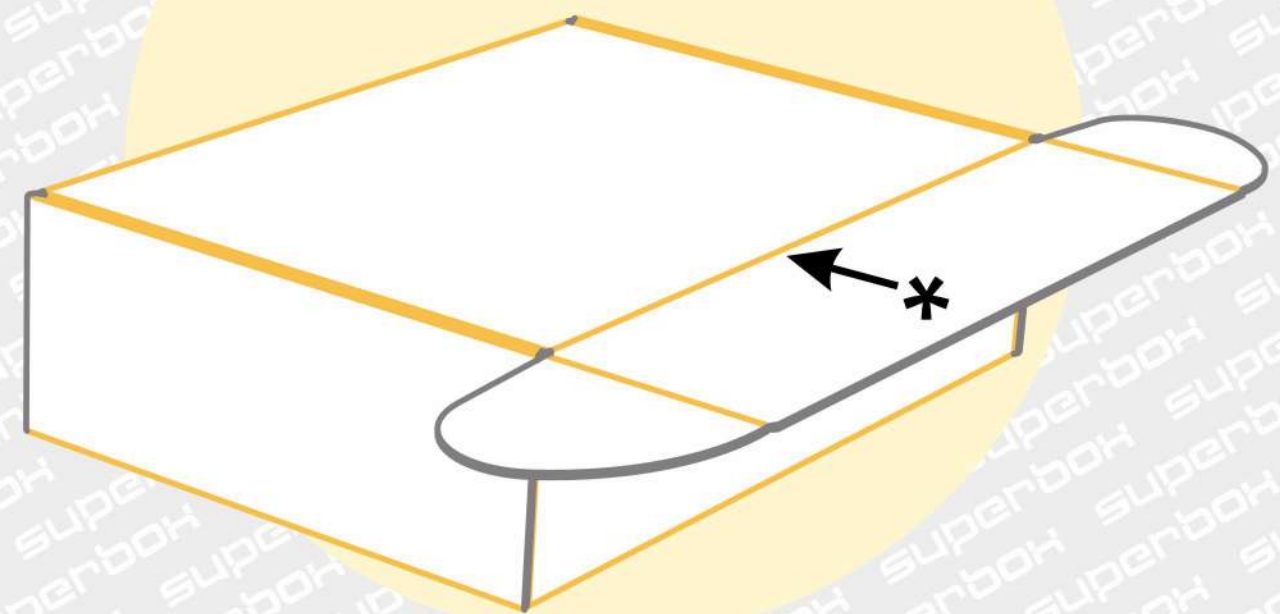

4. Fold the side walls and lock them in the openings on the bottom. *Make sure to fold both creases of the side walls.

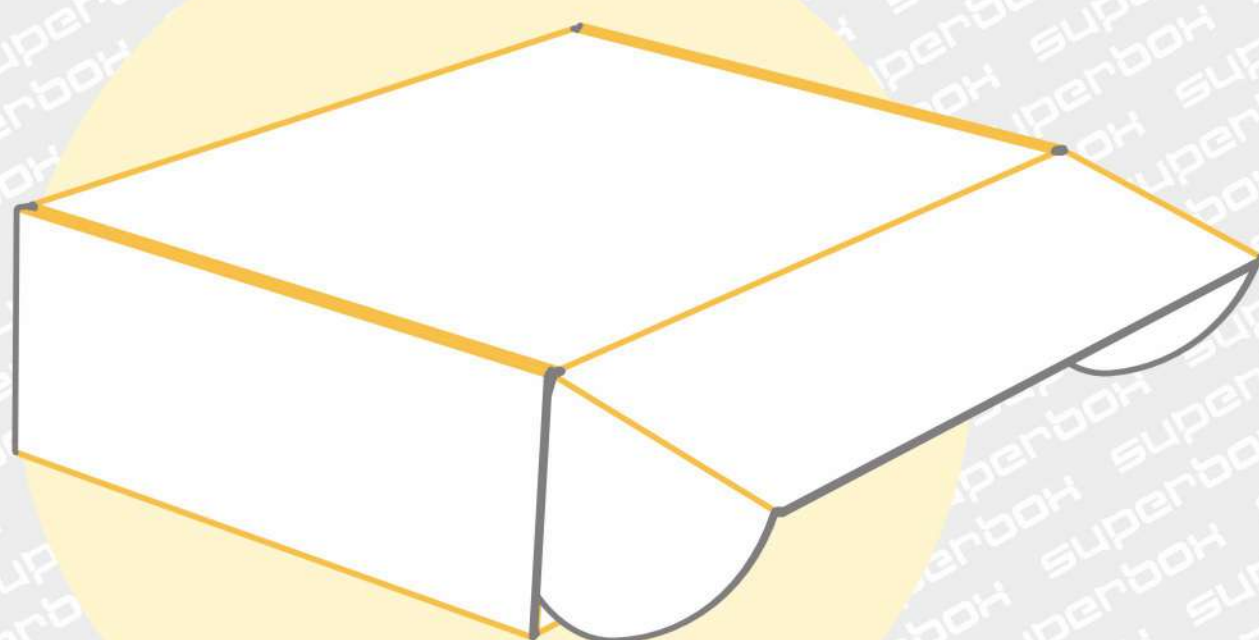

5. Pack your things in the box, fold the inner flaps of the cover, and close the cover.

6. * Fold the front wall of the box after fully folding the main sheet of the cover. If the cover sheet is slightly raised, the corners of the box may tear.

7. Fold the front wall of the box by inserting the box tabs into the spaces between the double side walls.

8. Enjoy a nicely folded box and check for the cat attaching its sticker on it.
